EXPERIENCE

EduSkills | Cohort-10 | Virtual   (Certificate) **July 2024 - September 2024**

- Developed backend systems using Java, Spring Boot, and RESTful APIs, focusing on scalability, security, and performance optimization.

- Built dynamic, responsive front-end applications with JavaScript and React, seamlessly integrating them with backend services for a complete full-stack solution.

PROJECTS

Brain Stroke Prediction   (Project Link)

- This Predicts brain stroke risks to enable early diagnosis and preventive therapy.

- Develops familiarity with machine learning tools in medicine and comparative model assessment.

- Utilizes Random Forest, SVM, XGBoost, ANN, and Python libraries for its execution.

Banking System   (Project Link)

- I used C programming and structs to create a simulated ATM banking system, managing user accounts, balances, and transactions efficiently.

- I gained experience in handling account creation, login validation, balance management, and secure transaction handling like deposits and withdrawals.
